# Table of Contents

Aggregate Demand

Multipliers

Short-Run Aggregate Supply (SRAS)

Long-Run Aggregate Supply (LRAS)

Equilibrium in the Aggregate Demand-Aggregate Supply (AD-DS) Model

Change in the AD-AS Model in the Short Run

Long-Run Self Adjustment

Fiscal Policy

Automatic Stabilizers

# Aggregate Demand

---

## The Wealth Effect

- Higher price levels reduce the purchasing power of money, which decreases the quantity of expenditures.
- Lower price levels increase purchasing power and increase expenditures

## Interest Rate Effect

- When the price level increases, lenders charge higher interest to get a REAL return on their loans

## Foreign Trade Effect

- When price levels rise, foreign buyers purchase fewer U.S. goods and Americans buy more foreign goods.  $X_n$  decreases.

An aggregate demand curve

Figure 1  
An aggregate demand curve

# Multipliers

---

- Marginal Propensity to Save (MPS); How much people save instead of consume when there is a change in income. Expressed as

$$MPS = \frac{\Delta \text{savings}}{\Delta \text{Disposable Income}}$$

- Marginal Propensity to Consume (MPC); How much people consume rather than saving when disposable income changes. Expressed as a fraction:

$$MPC = \frac{\Delta \text{consumption}}{\Delta \text{Disposable Income}}$$

- Spending Multiplier

$$\frac{1}{MPS} = \frac{1}{1 - MPC}$$

- Simple Tax Multiplier

$$\frac{MPS}{MPC}$$

# Short-Run Aggregate Supply (SRAS)

---

## Things that can affect SRAS

- Change in the prices of resources
- Changes in taxes, subsidies, or regulations
- Change in productivity
- Expectations

## Long-Run Aggregate Supply (LRAS)

---

- The curve shows what we can produce at the natural rate of unemployment.

# Equilibrium in the Aggregate Demand-Aggregate Supply (AD-DS) Model

---

- Puts aggregate demand and aggregate supply together.

- Recessionary gap doesn't necessarily mean there's a recession

## Change in the AD-AS Model in the Short Run

---

- This unit revolves around shifting curves, specifically SRAS, AD1
- Positive supply shock: the short supply increase.
- Cost push inflation, supply shifts left, and demand-pull shifts right.

## Long-Run Self Adjustment

---

## Fiscal Policy

---

## Automatic Stabilizers

---
